MaNGA DAP fit at the brightest H-alpha spaxel (row 37, col 37)
H-beta + [O III]
observed (DAP binned)
total model
stellar continuum
emission-line model
flux (1e-17 erg/s/cm2/A/spaxel)
observed wavelength (A)
H-beta + [O III] residual
data - model
residual
observed wavelength (A)
H-alpha + [N II] + [S II]
observed (DAP binned)
total model
stellar continuum
emission-line model
flux (1e-17 erg/s/cm2/A/spaxel)
observed wavelength (A)
H-alpha + [N II] + [S II] residual
data - model
residual
observed wavelength (A)
